### B. Worksheet Rationale

All Prairie School of Mission Aviation applicants must complete this form in order to calculate the total cost of education and to provide a foundation on which to build a reasonable financial plan. Please retain a copy for your records and submit original to the Admissions Office. Typically, the first year of the AAMA program focuses on classroom learning fulfilling the non-aviation requirements. These include Bible & Theology, Arts & Sciences, Church & Ministry courses. The second year focuses predominantly on classroom and practical flight training. For more specific information on courses please refer to the 2007-2008 Academic Catalogue.
